Portfolio: https://prajyoti04.github.io/Prajyoti-Portfolio

PROFILE SUMMARY

Data Science Enthusiast with hands-on experience in machine learning, data analysis, NLP, and deep learning. Skilled in data preprocessing, exploratory data analysis (EDA), feature engineering, and building end-to-end data-driven solutions. Passionate about extracting insights from structured and unstructured data to support intelligent decision-making using modern data science tools and frameworks.

EXPERIENCE

Data Science Intern – Echobrains
January 2026

- Currently undergoing training in **data science** within a professional environment
- Gaining hands-on exposure to real-world datasets and data-driven workflows
- Developing foundational skills in **data analysis and preprocessing**

EDUCATION

Bachelor of Engineering (B.E.) – Artificial Intelligence & Data Science
Angadi Institute of Technology and Management, Belagavi
2022 – 2026
CGPA: **8.13 / 10**

Pre-University (PUC)
Maratha Mandal PU College, Khanapur, Belagavi
Marks: **83%**

TECHNICAL SKILLS

Programming: Python, C

Frameworks/Libraries: Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Seaborn

Core ML Skills: Supervised & Unsupervised Learning, NLP, GNNs, Feature Engineering, Model Evaluation

Tools: Flask, Streamlit, Jupyter Notebook, GitHub, VS Code

KEY PROJECTS

1. Drug Repurposing and Composition Finder – Python, GNNs:

• Built a Graph Neural Network model to identify new therapeutic uses for existing drugs using molecular and compound similarity data from ChemDB and PubChem.

• Designed data pipelines for compound-target relationships and applied graph embeddings for accurate prediction.

2. AI-Based Code Generator & Fixer – Python, Flask, LLMs:

• Developed an AI system that generates and corrects Python code from natural language prompts.

• Integrated a Flask backend with a large language model for code understanding and debugging.

3. AI-Powered Resume & Job Matching System – Python, Streamlit, NLP:

• Created an NLP-driven application that matches resumes with job descriptions using TF-IDF and cosine similarity.

• Built a Streamlit web interface for real-time visualization and job-fit analysis.

4.Indian Road Intelligence – AI-Based Road Condition & Traffic Analysis System – Python, YOLOv8, OpenCV

• Built a real-time computer vision system to detect **potholes with severity classification (mild, moderate, severe)** and analyze traffic density from road videos.
• Designed a **road health scoring and trend analysis module**, generating annotated videos, CSV logs, and JSON reports for infrastructure monitoring.

CERTIFICATIONS

- NPTEL – Python for Data Science (IIT Madras)
- NPTEL – Data Science for Engineers (IIT Madras)
- Tata Forage – Data Visualization
- HP LIFE – AI for Beginners
- NPTEL – Joy of Computing Using Python

ACHIEVEMENTS

• Participated in multiple hackathons (Alliance University, GIT Belagavi).

• Created several ML & AI projects on GitHub.

• Continuous learner exploring deep learning, model optimization, and MLOps.

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Collaboration, Adaptability
